valentin.radulescu@live.com
<http://valentin.io>

Experienced **front-end** developer searching for an awesome remote team.

Driven by curiosity I spend my time between working on large scale web applications or building smaller personal projects, often trying out new APIs or emerging libraries, eager to bind them to my will.

Technical Skills

Likes: javascript reactjs redux less sass node.js react-native webvr

Experience

Front-End Developer – Hootsuite

May 2014 → Jul 2017

reactjs, redux, less, javascript, jestjs, docker, webpack, jenkins, git

As part of the Bucharest team I helped build the UI for Hootsuite's Analytics app from scratch using React, Redux and LESS. My main focus outside day-to-day tasks was on improving developer experience through documentation and better tooling. I was also involved with organizing a biannual React Meetup.

Achievements: Kickstarted an internal repo of shared React components during a hackathon that ended up being used across the company.

Freelance Frontend Developer – Upwork Global (formerly Elance-oDesk)

Jan 2013 → May 2014

html5, css3, javascript, jquery, responsive-design, sass, twitter-bootstrap

Worked with international clients and gained a good reputation as a freelance front-end developer. Successfully completed multiple projects for both large and small businesses and gained consistent positive feedback.

Achievements: Currently hold a rating of 4.97 out of 5

Front-End Developer – Winarrow

Jan 2012 → Jan 2013

html, css, php, seo, javascript, wordpress, photoshop

I was tasked with writing standards compliant, cross-browser compatible HTML and CSS for a large number of niche e-commerce websites.

Responsibilities: PSD to HTML slicing, convert sliced designs to Wordpress themes, SEO, A/B testing

Projects & Interests

Codevember 2017 – <https://codepen.io/collection/AGzkME/>

Nov 2017 → Current

iframe, three.js, sass, javascript

Build a short visual demo every day through the month of November. My focus was on trying out new frameworks and techniques. If you're reading this before the end of the month please make sure to check back at the end to see all of my creations :)

Public Artifacts

React VR 101 talk at React.js Bucharest Meetup #6 – https://youtu.be/v_tAxOD2ZsE

Apr 2017

A talk on the basics of React VR and WebVR given at the React Bucharest Meetup (romanian language).

Apps & Software

A Watch by You – <http://designawatch.okmylo.com/>

Apr 2014

sass, jquery, php, responsive-design

A microsite built to get user feedback for an upcoming Kickstarter campaign. The gathered feedback was used to dictate what the final product (a set of watches) looked like.

MYLO: Essentials x A Better Backpack – <http://essentials.okmylo.com/>

Nov 2013

sass, jquery, php, responsive-design

A microsite showcasing essential items for designers and creatives. Built to work flawlessly on desktop, tablet and mobile.

Tools

Favorite Editor: Visual Studio Code
