Valentin Radulescu

Front-End Engineer | React, TypeScript & React Native

valentin.io | Bucharest, RO | hi@valentin.io | +40 721 809 508

Front-end engineer with 9 years of experience building user interfaces and the systems that support them. Developed Skype's messaging interface with React Native and helped build Hootsuite Analytics from the ground up with React. Took a career break from 2022 to 2025 while pursuing a BSc in Computer Science. Now seeking new front-end opportunities and open to office-based roles, relocation, or remote work.

Front-End skills: React | React Native | TypeScript | JavaScript | HTML | CSS

Additional skills: Jest | TDD | Git | Django | REST APIs

Work Experience

Software Engineer at Microsoft - Skype

Sep 2019 — May 2022

Built and maintained Skype's messaging interface using React Native and JavaScript.

- Implemented the ability to quote multiple messages in Skype chat
- Contributed to a cross-team effort that enabled conversations between Skype and Microsoft Teams
- Developed a Microsoft Teams feature for iOS and Android that allowed users to invite contacts by phone number

Front-End Developer at Memory.ai

Feb 2018 — Nov 2018

Helped craft the UI for Timely, a fully automatic time tracking solution that leverages the power of AI.

- Implemented a redesigned billing interface based on product designs
- Expanded the implementation of the calendar sync UI
- Worked primarily with React, Redux, Reselect, Sass and Jest

Software Developer at Hootsuite

May 2014 — Jul 2017

Helped build the UI for Hootsuite Analytics from the ground up.

- Started a reusable React components repository during a hackathon that was later used across the company
- Applied TDD practices, mentored interns, improved tooling and developer experience, and helped organize a biannual React Meetup
- Worked primarily with React, Redux, LESS, Webpack and Jest

Freelance Front-End Developer at Independent (via Upwork)

Jan 2013 — May 2014

Built microsites, blogs and single-page applications for international clients through Upwork.

- Delivered projects for international clients, including digital agencies, startups and businesses of varying sizes
- Worked with JavaScript, jQuery, WordPress, Sass and PHP
- Maintained an overall client rating of 4.97 out of 5

Education

BSc Computer Science at University of London

Apr 2021 — Nov 2025

- Graduated with First-Class Honours
- Final project: TasteMender, a music recommendation application and stateless API built with Django and React

Projects

postcss-prefix-selector

https://github.com/RadValentin/postcss-prefix-selector

Open-source PostCSS plugin for prefixing CSS selectors - used for style isolation.

- Maintained the package, documentation and compatibility with the PostCSS ecosystem
- 100k+ weekly downloads, 200+ GitHub stars, used by 73K projects

TasteMender | Music Recommendation App

https://github.com/RadValentin/taste-mender

Started as a university project and continued after graduation to explore more varied music recommendations than those offered by mainstream streaming platforms.

- React, Django, PostgreSQL, Python
- Loads a dataset with 30M submissions and 7M unique tracks into memory and produces recommendations based on listening history in under 100ms
- Live demo: https://taste-mender.com/
